The Best **Quality** for Your Best Performance

SENOH's Indoor and Beach Volleyball Systems were used in TOKYO2020. Since TOKYO1964 at which volleyball first became an Olympic sport, and beach volleyball joined at Atlanta in 1996, Senoh has been the official supplier in almost all the Olympic Games.

Senoh has the equipment that meets all of the standards of volleyball's governing bodies. Today, Senoh's volleyball systems have become the most widely known and used in the world, which in turn makes Senoh as the international standards.

SENOH's achievement extends to Olympic Games, World Championships, World Junior/Youth Championships, World Cup, World Grand Champions Cup, Volleyball Nations League, Beach Volleyball World Tour, Beach Pro Tour, Regional Tournaments of NORCECA, CSV, CAVB, CEV, and AVC, Professional teams, University, College, School and Stadiums.

■ Durability - Senoh Steel

Senoh's FIVB approved official volleyball posts (DE1015) are made of special cold drawing steel tube that is specially manufactured for volleyball.

General steel pipe has a joint as it is made by rounding then welding a flat plate. This process enables inexpensive mass production but the welded part causes a quality unevenness. Senoh steel tube has no joint (imagine drawing a hole from a round pillar) and this seamless steel allows inner tube to move up and down smoothly and obtains stability in both toughness and deflection. Also due to its thickness, DE1015 can be approximately 3 times stronger compared to general steel posts. Senoh Steel Posts withstand the power of top athletes.

	1. Yield Point	2. Tensile Strength
Senoh Steel Φ76.3, TH5.15mm	★★★	★★★★★
General Steel Φ76.3, TH4.2mm	★	★★

1. Boundary that the deformation is not restored to its original condition.

2. Strength at breaking point

■ Lightweight - Senoh Carbon

The lightest carbon posts (DE5300) have been released by combining Mizuno carbon technology and Senoh manufacturing expertise.

This light product (only 23kg in pair) enables women, children, and the elderly, to carry and set up more easily and safely. Besides, the carbon is free from rust and paint peeling in a long term use. For volleyball as lifelong sport --- Senoh is proud of providing all the volleyball players with the variety of products that are absolutely safe and have a long life.

■ Renovation - Senoh Beach System

Senoh's Beach Volleyball System has been consecutively selected at Olympic Games since Atlanta 1996 to London 2012 and TOKYO 2020.

The succeeding system comes into the world. The new products are renovated for beach use --- dust/ water/ rust proof, easy height adjustment, reasonable weight to handle --- and sustain the durability for high performance.

■ Accurate & User-Friendly Design

Height Adjustment

Senoh's bevel gear enables stepless height adjustment (1900-2430mm) and accurate net height setting is feasible according to various floor thickness.

Designed Inclination

Senoh's floor apparatus (for indoor) and anchor system (for beach) are designed to be inclined outward taking "a bow of upright by net tension" into account.

* Excessive net tension may cause a damage on net or upright. Net tensioning limit should be 90 degree (until the upright stands vertically).

■ Visibility - Perfect Square

Hard to see if net is distorted --- Senoh's technology creates "Perfect Squares" of the net for high visibility.

Material Technology

Senoh's net string is composed of 360pcs of ultra fine fiber (90T). This Superlex (90T/360) enables Senoh net being light, tough, and flexible.

Manufacturing Technology

The upper white bands are stitched with cords and adjust the net square s easily.

"Perfect Squares" make it possible to highlight your logo.

Logo print on DE800361 (official volleyball net with 45mm square mesh) is available upon your request.

■ Tension Strength & Durability

Rope end is caulked in 2 ranges and the compressed fitting with resin prevents ropes coming off.

Senoh Caulking

General Caulking

Tension at side ropes is even and this way of tying prevents crease or tear.

Senoh Rope Work

General Rope Work

Senoh Technora Cable
Technora cable enables high tension strength and durability without fray or torsion.

	1. Yield Point
Tension Strength	Cleared 8000[N] (load of general use: 2500[N])
Durability	Cleared 10000 times load test of 0 ~ 2500[N]

■ White & Clean

White band is a part being touched very often --- specular working prevents stain or finger marks and keeps the bands white and clean. Senoh's smooth and even white band enables to receive clear logo printing.

White Band with specular working (Senoh)

Senoh white band

**White Band without specular working
Uneven surface catches finger marks easily.**

Gneral White Band

FIVB Approved Indoor Volleyball System

Senoh's "Volleyball & Beach Volleyball Posts, Safety Pads, Net & Antennae and Referee Chair" have been approved by FIVB as official equipment since 1992.
